Experience quality:

ISRI® 6500/517 PRO

The ISRI® 6500/517 is a good representative product from our new seat generation of seats. Proven quality and convincing technology make this seat a reliable partner on long journeys. The flat air suspension system as well as a high backrest ensure a high comfort level. Seat and backrest cushions are anatomically formed and the operating controls are ergonomically positioned. A final advantage of this comfort seat is the attractively designed air-permeable cover.
